Arlington, Virginia 22202

SUBJECT: Editorial Quality Assurance (QA) Review of the  
DePue/N.J. Zinc/Mobil Chemical Corp site under contract  
68-W2-0030, Work Assignment 2-01, Task 02

Dear Mr. Myers:

DynCorp is submitting this letter to address several issues identified in the editorial QA review of the final submission of the DePue/N.J. Zinc/Mobil Chemical Corp HRS package (CERCLIS ID ILD062340641) in Region 5. Copies of this letter, relevant pages of the documentation record annotated with editorial comments, and a diskette containing the complete revised HRS documentation record have been sent to Mr. Alan Altur, U.S. EPA Region 5 Site Assessment Manager, for review.

Several minor editorial errors have been identified in the QA review of the revised documentation record. These errors have no effect on the site score. As instructed by EPA Headquarters, DynCorp has made the corrections. No additional changes to the documentation record by the Region are necessary; however, a diskette containing the documentation record is being submitted to the Region for review. The Region is being asked to sign the attached review sheet to indicate their approval of the changes. DynCorp does not expect any additional changes, either technical or editorial.

Please note that Mr. Altur was informed on May 31, 1996 that DynCorp did not have References 72 and 73 and the scoresheets for the site in DynCorp's copy of the HRS package. DynCorp subsequently received these documents on June 4, 1996.

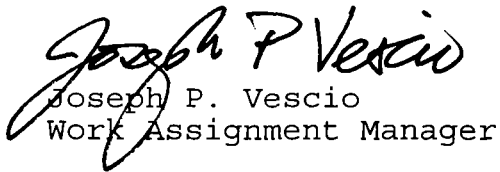

If you have any questions or comments please call me at (703) 519-1328, Matthew Hayduk at (703) 519-1337, or Joe Vescio at (703) 519-1474.

Sincerely,

William Chantry  
Region 5 Coordinator

Joseph P. Vescio  
Work Assignment Manager
